PROFILE SUMMARY

Full-stack developer skilled in React and ASP.NET Core, experienced in building scalable web applications and RESTful APIs, integrating frontend and backend systems to deliver efficient, user-focused solutions.

EDUCATION

Maharishi Markandeshwar (Deemed to be University)

B.Tech CSE

Ambala, Haryana, India

Aug 2022 - May 2026

TECHNICAL SKILLS

Programming Languages: JavaScript, C#

Backend: ASP.NET Core, Web API, SignalR, Dependency Injection, Repository Pattern, Clean Architecture

Data: SQL Server, Entity framework core (tracking, no-tracking, split-queries, indexing), Dapper

Frontend: React.js, RESTful API integration, responsive UI

Cloud and DevOps: Azure (App Service, Static Web Apps, Azure SQL), Docker, Git, Linux

WORK EXPERIENCE

Frontend Developer Intern

The Quality SEO Pvt. Ltd., Lumbini, Nepal

May 2025 - July 2025

- * Developed dynamic and responsive web interfaces using React.js, improving user experience and overall site performance.
- * Collaborated in an Agile team environment with designers and backend developers to deliver features on time and maintain clean, reusable code.
- * Integrated RESTful APIs and optimized component performance, reducing page load time and enhancing front-end efficiency.

PROJECTS

Real-Time Order Tracking System | ASP.NET Core, SignalR, React, SQL Server, Azure

Event-driven order tracking platform with role-based workflows.

[Github Link](#)

- * Built real-time integration using SignalR for instant bidirectional communication between backend services and client applications across multiple user roles.
- * Developed RESTful APIs with JWT authentication and role-based authorization for secure order management operations.
- * Optimized SQL Server queries with Entity Framework Core for efficient high-volume transaction handling.
- * Deployed full-stack application on Azure using App Service for backend APIs and Azure Static Web Apps for React frontend.

Appointment | React, ASP.NET Core Web API, NeonDb

Designed a scalable booking system with tenant isolation using ASP.NET Core and React.

[Github Link](#)

- * Built a multi-tenant appointment booking system using ASP.NET Core Web API and React, enabling businesses to manage services, schedules, and bookings in isolated environments
- * Designed RESTful APIs to handle appointment workflows, schedule management, and tenant-specific configurations supporting concurrent multi-business operations
- * Developed a responsive React dashboard integrated with a multi-tenant backend for managing bookings, availability, and services with role-based access control

StockWise | ASP.NET Core Web API, SQL Server, C#

RESTful API system for stock portfolio management.

[Github Link](#)

- * Designed RESTful APIs with proper HTTP methods, versioning, and CRUD operations for portfolio and transaction management.
- * Implemented JWT-based authentication and RBAC to secure financial data and protect sensitive API endpoints.
- * Engineered optimized SQL Server interactions using Entity Framework Core with transaction management and stored procedures.
